Davi Castro Jorge da Costa

Full-stack developer

Junior Programmer at Audicom Telecom · B.S. in Information Systems at Uniube, graduating Dec 2026

Uberlândia, MG · Brazil · contato@davicjc.com · +55 34 99333-6186 · davicjc.com · github.com/Davicjc · linkedin.com/in/davicjc · orcid.org/0009-0005-8485-455X

SUMMARY

Full-stack developer. I build web systems end to end, from the interface to the database and the deploy, and keep them running in production. At Audicom Telecom, where I started in support and am now a Junior Programmer, I build the internet provider's internal systems: NexusAtlas (field-service orders), Audicom Hub (tickets, patrols, fleet and stock) and the in-house speed test. I also wire biometrics and facial recognition into access control and look after the infrastructure all of it runs on. Before that, at Algar Telecom, I served international wholesale customers in English.

SKILLS

Front end	JavaScript · TypeScript · React · HTML5 · CSS3 · Tailwind CSS · PWA · Chart.js · Leaflet
Back end and data	Node.js · Python · FastAPI · Flask · C# · Firebase (Auth, Firestore, Rules) · PostgreSQL · SQLite · REST · WebSocket · WebRTC
Integrations and automation	OpenCV · facial recognition and biometrics · Raspberry Pi · Cloudflare · Git
Infrastructure and operations	Linux · Nginx · systemd · VMware ESXi · WireGuard · MikroTik · Cisco · Ubiquiti · BGP, RPKI and OSPF · Zabbix · Grafana

EXPERIENCE

Junior Programmer — Jul 2026 — present

Audicom Telecom · Development and network infrastructure

I build the operation's internal systems — NexusAtlas, Audicom Hub, the in-house speed test and the OSPF/BFD, RPKI and POP monitoring tools — and run VMware ESXi servers, WireGuard tunnels and MikroTik, Cisco, Ubiquiti and Datacom gear, monitored in Grafana and Zabbix. I still help supervise the NOC, HelpDesk and network operations teams.

Support Agent — acting as Full Stack Developer, Network Technician and Deputy Supervisor

Sep 2025 — Jul 2026

Audicom Telecom · Support, NOC and HelpDesk

I joined support and within a few months was building the internal systems, wiring biometrics and facial recognition into turnstile access control and looking after the network infrastructure. I rolled out an LMS with single sign-on (SAML/OIDC) and helped supervise the NOC, HelpDesk and network operations teams.

Bilingual Enterprise Account Manager (Computer Support Analyst) — Dec 2023 — Jun 2025

Algar Telecom · Wholesale · enterprise accounts

I handled the carrier's wholesale segment in English, serving international customers such as Verizon, BT and China Telecom. I drove critical connectivity incidents through to resolution and tracked those customers' infrastructure in Grafana and Zabbix.

Customer Service Agent · Bradesco support line — Oct — Dec 2023

Callink · Bradesco operation

Customer service for the Bradesco operation, using structured questioning to understand and resolve complex requests.

Founder and Web Developer

2023 — closed

Web pra Você · own business

Websites for small and mid-sized businesses, covering proposal, design, development and launch. The business has since closed.

SELECTED PROJECTS

NexusAtlas

LIVE · 2026

The field-service SaaS Audicom's operation runs on every day.

JavaScript · Firebase Auth · Firestore · WebRTC · Leaflet — nexusatlas.com.br

Audicom Hub

LIVE · 2026

An internal portal with 10 modules — tickets, patrols, fleet and stock — with permissions enforced in the database.

JavaScript · Firebase Auth · Firestore · Firestore Rules · Chart.js — davicjc.github.io/AudicomHub

Audicom Speed Test

IN DEVELOPMENT · 2026

The provider's own speed test, measured on the customer's real route.

Node.js · WebRTC · WebSocket · Web Workers · SQLite — velocidadeteste.audicomtelecom.com.br

Face Safety

ARCHIVED · 2023

Facial-recognition access control — 1st place among 60 projects.

Python · OpenCV · YuNet · SFace (ONNX) · NumPy — github.com/Davicjc/FaceSafety

PopManager

IN DEVELOPMENT · 2026

A FastAPI service and web dashboard for point-of-presence inventory and monitoring.

Python · FastAPI · SQLAlchemy · asyncio · PostgreSQL — davicjc.com/en/projects/popmanager

Ecolyra

IN DEVELOPMENT · 2026

Real-time translated lyrics that listen to the music, on top of any window.

Python · Tkinter · Shazam · yt-dlp · FFmpeg — github.com/Davicjc/Ecolyra

EDUCATION

B.S. in Information Systems

Feb 2023 — Dec 2026 (expected)

Universidade de Uberaba (Uniube)

Face Safety, my facial-recognition access-control system, took 1st place among 60 academic projects in the program (May 2023).

LANGUAGES

Portuguese · native

English · advanced · Wizard by Pearson certificate (2019); international B2B support at Algar

Spanish · basic

CERTIFICATIONS

Microsoft Learn · 13 achievements: migrating workloads and SQL Server to Azure, Azure database administration, Linux and Java on Azure, AI solutions and engineering, GitHub Copilot and Azure Copilot; Migrate & Modernize Challenge.

Alura · Python for development and automation track (100 h) · Windows command line (5 h) · English for tech (10 h).

Algar Telecom · Brazilian data protection law, LGPD (121 h, 6 courses) · Code of Conduct.

Hacker Rangers · Information security (2 courses).
